As a customer of **partner x,** you can easily and smoothly integrate with Ongoing WMS, which creates a seamless flow of information between the services.

Long version

Do you need to streamline your warehouse and logistics management? Ongoing WMS is a web-based Warehouse Management System for logistics-intensive e-commerce companies. The service helps you automate and pick faster with better accuracy.

Smart functions that streamline your warehouse
Ongoing WMS helps you automate and pick faster with greater transparency and more control over your warehouse. The service enables tracking of serial numbers, batch, and best-before dates. The picking of products becomes free of errors through a range of scanning functions. Combining batch picking scanning with a picking cart is a good example of how order picking can be made more efficient for e-tailers.

Get started quickly
You get started right after you have received an introductory web demo. Our customers find Ongoing WMS easy to use, intuitive, and easy to learn. Existing integrations make the process easier to get started. Software as a Service (SaaS) involves a monthly fee based on the number of users - no entry fee or cumbersome installation is required.

Personal and fast customer service
As a customer, you will be assigned a competent and logistics-savvy system developer as your personal contact person. Your contact person will provide fast help so that your logistics always flow efficiently.

The market's largest range of Integrations & APIs
Ongoing WMS has the market's largest range of integrations to e-commerce platforms, ERPs, transport systems, and automation solutions. Modern APIs (technical interfaces) allow other parties to easily integrate.

Ready-made integration

As a partner x user, you can easily and smoothly get started with Ongoing WMS by using the ready-made integration. The integration creates a seamless information flow where items and orders are automatically transferred from the webshop to Ongoing WMS. At the same time, stock balances from Ongoing WMS are reported back to the webshop.

Of course, the integration works just as well for those who outsource their stock to a 3PL company that uses Ongoing WMS.
